

DHAIRYA SHAH

Full-Stack / MERN Stack Developer & AI/ML Engineer

Bharuch, Gujarat, India | +91 88496 37157 | shahdhairya069@gmail.com

LinkedIn: linkedin.com/in/dhairya-shah | GitHub: github.com/dhairya-shah

PROFESSIONAL SUMMARY

Full-Stack developer with hands-on experience building production-grade MERN applications for real clients and active internship. Combines web development expertise with AI/ML capabilities using technologies such as Python, TensorFlow, and scikit-learn to build intelligent, user-centric products. Holds a 9.0/10 CGPA academic record with experience delivering end-to-end solutions ranging from accessible UI design to secure RESTful APIs.

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern

Technoviewer

Bharuch, India | Jan 2026 – Present

- Developing and maintaining 3+ full-stack web applications using the MERN stack.
- Applications serve 1,000+ active users across client deployments.
- Built RESTful APIs with JWT authentication handling 500+ daily requests.
- Focused on data integrity, query optimization, and security across MongoDB environments.

Full Stack Developer (Freelance Client)

TanushBuildCon

Jan 2025 – Feb 2025

- Built responsive React frontend and Node.js/Express backend for a commercial construction platform.
- Website went live, serving 300+ monthly visitors with zero downtime.
- Implemented secure inquiry management handling 50+ monthly client submissions with automated email integration.

FEATURED TECHNICAL PROJECTS

CollabBoard — Real-Time Collaborative Whiteboard

React, Node.js, Socket.io, Redis, JWT, MongoDB

- Built a multiplayer whiteboard supporting 10+ simultaneous users with conflict-free collaborative editing.
- Used Socket.io and Redis Pub/Sub for real-time collaboration and state synchronization across sessions.
- Implemented JWT authentication with refresh-token rotation and role-based access (Owner, Editor, Viewer).
- Engineered session persistence using MongoDB for continuous canvas recovery.

HealthBridge AI — AI-Powered Healthcare Platform

React, Node.js, MongoDB, OpenAI API, Socket.io, Tailwind

- Integrated an LLM-powered symptom triage chatbot using OpenAI API, serving 200+ test users during beta.
- Built WebSocket-based real-time doctor-patient chat using Socket.io, achieving sub-100ms message latency.
- Designed accessible UI in Figma and implemented in React & Tailwind CSS, scoring 95+ on Lighthouse accessibility audits.

Auramed — Pharmaceutical Showcase & API Engine

React, Node.js, MongoDB, Express

- Engineered a React-based product showcase with dynamic listings for 100+ pharmaceutical products.
- Reduced average page load time by 35% through lazy loading and optimized MongoDB query compound indexing.

TECHNICAL SKILLS

Frontend:	React.js, Next.js 14, TypeScript, JavaScript ES2023, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, Zustand
Backend:	Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication, Socket.io, Redis, Flask
AI / ML:	Python, scikit-learn, TensorFlow, Pandas, NumPy, OpenCV, NLP / spaCy, OpenAI API
Testing & DevOps:	Jest, React Testing Library, GitHub Actions, CI/CD, Docker, Vercel, Netlify, Render
Tools:	Git, GitHub, VS Code, Postman, Figma

EDUCATION

Charotar University of Science and Technology (CHARUSAT)

CGPA: 9.0 / 10

B.Tech in Information Technology | Changa, India | Sep 2022 – Apr 2026
